EDUCATION

Full-stack Web Development

11/2021 - 11/2022

DCI Digital Career Institute (Berlin)

- Accomplishing a one-year-full-time training including technologies from MERN stack
- Completing multiple projects and one large full-stack team project to practice and showcase programming skills

Research Training Program

09/2016 - 12/2019

Humboldt University Berlin

- developing a PhD proposal on the media construction of preimplantational genetic tests in Hungary

MA Sociology (very good)

09/2012 - 06/2015

Corvinus University Budapest

- Specialising in organisational and economic sociology

BA Social Sciences (very good)

09/2009 - 06/2012

Corvinus University Budapest

- Specialising in equal opportunities and social policies

SELECTED PROJECTS

NÖIX (MongoDB, Express, React, Node)

- Team project: creating a MERN-Stack app for musicians to find band members and music collaboration partners who live in the same city. I was in charge of writing the server side code and establishing communication with the client side using API calls. Besides that I took a great part of developing the real-time chat feature using socket.io and creating the custom multi-audio player and database management.

Library (MongoDB, Express, React, Node)

- Team project: creating a full-stack mockup library, in which I wrote a great part of the server-side code, implemented state management using context API on the client side and took part in database management

WORK EXPERIENCE

Full-stack Engineer Intern

11/2022 - now

Target Mobility GmbH - Movacar

- Developing frontend features with Angular and Typescript
- Fixing bugs and refactoring old code blocks on the company's B2B platform
